

number of columns  
`getSize()(1)`

cell value for a layer  
`at(layer, index)`  
`atPosition(layer, position)`

resolution/grid size [m/cell]  
`getResolution()`

length in x-direction [m]  
`getLength().x()`

position of grid map  
`getPosition()`

**grid map frame**  
x  
y z

number of rows  
`getSize()(0)`

*grid map center*

length in y-direction [m]  
`getLength().y()`

cell index at position  
`getIndex(...)`

position of a cell [m]  
`getPosition(...)`
